VEGETABLES

ASIAN GREENS BOK CHOI SHANGHAI GREEN

This green stem variety is very popular in South China. It has an attractive hourglass shape with glossy, dark green leaves, and thick petioles that are tender and very delicious. It is high yielding and known for its heat tolerance. Also called Shanghai Pak Choi.

HARVEST 35 DAYS
SEED / SEEDLING
PLANTING COOL

ASIAN GREENS TATSOI RAINBOW

The round flat rosettes of teardrop-shaped leaves grow in shades of greens and purples. The heads can reach 30 cm (1') in diameter. The tender, succulent leaves have a wonderful mild flavour, sweeter than most other Asian greens. Great in salads or steamed.

HARVEST 30 DAYS
SEED / SEEDLING
PLANTING COOL

BEAN BLUE COCO POLE

Vigorous, high-yielding dark purple snap beans. Beautiful plants with violet flowers, dark green leaves, contrasting purple undersides and stems. French heirloom dating back to the 18th century. Tolerates heat, cold and drought. Pods grow to 15-18 cm (6-7").

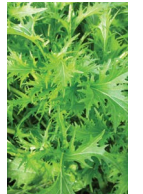

HARVEST 65 DAYS
SEED
PLANTING WARM

ASIAN GREENS MIZUNA

Mild and sweet enough for salads, the thin, light green, feathery leaves are deeply cut but not curled. Plants grow vigorously. Cut-and-come-again throughout the season or pick individual leaves. Will grow even under low-light conditions.

HARVEST 45 DAYS
SEED / SEEDLING
PLANTING COOL

ASPARAGUS MARY WASHINGTON

An heirloom variety with a fuller flavour. 10 crowns should produce enough for 2 people. Asparagus plants are perennial and can continue to produce for up to 20 years! Planted as bare root crowns, they will reproduce from female flowers in your growing bed.

HARVEST 1 YEAR
CROWN
PLANTING COOL

BEAN EDAMAME SOYA

Eat fresh pods as Edamame. The dry bean is green as envy. Earliest green soybean. Upright 2' plants ripen early. Boil fresh in the pod at green stage. After boiling remove beans from pod to eat. Or, leave to mature and use as dry bean. Exceptional quality and yields.

HARVEST 75 DAYS
SEED
PLANTING WARM

BEAN GRAND-MAMAN DINEL YELLOW POLE BEAN

A medley of green, yellow and purple bush beans. Plant just one packet and harvest a colourful assortment of snap beans. Pick at least twice a week to keep up production.

HARVEST 65 DAYS
SEED
PLANTING WARM

BEAN KAHNAWAKE MOHAWK POLE BEAN

This very productive pole bean can be eaten as a snap bean or as a dry bean. The dry orb-shaped beans are beautifully coloured—tan with brown stripes.

HARVEST 65 DAYS
SEED
PLANTING WARM

BEAN PROVIDER GREEN BUSH BEAN

Early green snap bush bean with heavy yields. Can be planted earlier than other beans as it germinates well in cool soils. Compact plants are easy to grow and adaptable to diverse soil conditions. Produces 15 cm (6") fleshy round pod beans.

HARVEST 50 DAYS
SEED
PLANTING WARM

BEAN RED SWAN BUSH BEAN

This is a stringless snap bean with flat pods that ripen to a deep rose-purple and grow to 10–15 cm (4–6") in length. The beans turn bright green when cooked. Tan seeds.

HARVEST 54 DAYS
SEED
PLANTING WARM

BEAN ROCDOR YELLOW BUSH

An early wax bean with a rich and buttery flavour. Slim, 15 cm (6"), glossy yellow pods are crisp, tender and stringless. Since the seeds develop slowly, the pods hold their high quality over a long period. The plants tolerate cool, wet conditions better than most varieties.

HARVEST 53 DAYS
SEED
PLANTING WARM

BEAN ROYAL BURGUNDY

A vigorous sprouter, its pretty purple flowers keep blooming to provide a long harvest. Dark purple 13 cm (5¼") pods turn green after cooking.

HARVEST 60 DAYS
SEED
PLANTING WARM

BEAN SCARLET RUNNER

Tall vining ornamental plants with red flowers and edible fruit. Eat the flowers, green pods when young and tender, or wait for large purple and black dry beans. Note: If you eat all the flowers, you won't get any beans.

HARVEST 67 DAYS
SEED
PLANTING WARM

BEAN SNAP BUSH BEAN MIX

A medley of green, yellow and purple bush beans. Plant just one packet and harvest a colourful assortment of snap beans. Pick at least twice a week to keep up production.

HARVEST 60 DAYS
SEED
PLANTING WARM

BEAN SNAP POLE BEAN MIX

A medley of green, yellow and purple pole beans. Plant just one packet and harvest a colourful assortment of snap beans. Pick at least twice a week to keep up production.

HARVEST 65 DAYS
SEED
PLANTING WARM

BEET DETROIT DARK RED

The most popular all-purpose red beet; large, uniform and smooth, blood-red flesh that is sweet, tasty and tender. 14" tops make good greens. Heirloom variety from 1892. 3" round roots and delicious green tops with red stems. Vigorous, fast spring growth.

HARVEST 55 DAYS
SEED
PLANTING COOL

BROCCOLI DE CICCIO

Delicious, crunchy dark green broccoli. Produces a 7–10 cm (3–4") head followed by many smaller side shoots. Great for backyard gardens. A great Italian heirloom.

HARVEST 85 DAYS
SEED / SEEDLING
PLANTING COOL

CABBAGE GOLDEN ACRES

An excellent early summer variety ball head cabbage, with small-to medium-sized green, round solid heads on compact plants with few outer leaves.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING COOL

BEET CHIOGGIA

Pre-1840 Italian heirloom beet, this variety arrived in North America prior to 1865. They have light red skin and beautiful rings inside, like red and white candy stripes. The flesh is very tender, mild and sweet. Named after a fishing town in Italy, a favourite here.

HARVEST 60 DAYS
SEED
PLANTING COOL

BEET TOUCHSTONE GOLD

Beautiful bright colour and delicious taste make these beets a delight! Have a vibrant yellow interior and red skin. The strong tops are green with green stems and pale golden petioles, while roots are a vibrant orange, uniformly globe-shaped, and very smooth.

HARVEST 55 DAYS
SEED
PLANTING COOL

CABBAGE RED JEWEL

Summer/fall harvest. High yielding, with very uniform maturity. Red Jewel has deep red heads under purple/blue wrapper leaves. The core is short, so it's ideal for shredding. Nice overall flavour and decent tolerance to cold snaps.

HARVEST 80 DAYS
SEED / SEEDLING
PLANTING COOL

CARROT WITCHES FINGERS

Ideal for confined areas. Heads average 2 kg (4 lb), and 15 cm (6") in diameter. An old heirloom variety.

HARVEST 70 DAYS
SEED
PLANTING COOL

CARROT SCARLET NANTES

A workhorse variety that is widely adapted and often out-performs many hybrids. Strong tops and excellent heirloom flavour in 18-cm (7") roots that colour up early for optional harvests as baby carrots. At maturity, great for storage, juicing and freezing.

HARVEST 65 DAYS
SEED
PLANTING COOL

CORN DAKOTA BLACK POPCORN

Black ears of corn are quite attractive for fall decorations, or tasty popcorn! Perfect rows of beautiful, purple-black kernels all the way to the tip. Sturdy 2-m (6-7") plants typically have one 10-15 cm (5-6") ear per plant. Easy to grow, and fun for children's gardens.

HARVEST 95 DAYS
SEED
PLANTING WARM

CORN TOM THUMB

Extra-early popcorn succeeds even in cold climates. Dwarf 1-m (3') plants each produce 1-2 petite 8-10 cm (3-4") yellow ears that make charming ornaments when dried. Pops well with a slightly denser texture than commercial popcorn. A fun crop for children to grow.

HARVEST 85 DAYS
SEED

CUCUMBER SUPER ZAGROSS

Heavy yielding Lebanese-style cucumber. Green smooth-skinned fruits are refreshingly cool. Enjoyably mild and almost completely free of the bitterness common in American slicers. So thin-skinned, juicy and refreshing.

HARVEST 54 DAYS
SEED / SEEDLING
PLANTING WARM

CELERY TALL UTAH

An early and disease-resistant celery that's slow to bolt. Tall, medium green celery with long, thick stalks that are sweet and smooth in the kitchen. It holds its form and colour in the field well.

HARVEST 100 DAYS
SEED / SEEDLING
PLANTING COOL

CORN PAINTED MOUNTAIN FLOUR CORN

Very early and grows fast, even in cold climates. Short 1-1.5 m (4-5') plants bear 18-cm (7") ears. Kernels are bright rainbow colours. Can be eaten as sweet corn, hominy, or ground into flour. Has a soft flour starch that grinds easily for wonderful cornbread and any other corn product.

HARVEST 95 DAYS
SEED
PLANTING WARM

CUCUMBER DRAGON EGG

These cucumbers' cream-coloured skin and chubby 10-15 cm (4-6") globes really do look like eggs growing on a vine. A refreshing, mild flavour and doesn't need peeling. Yields well – a few plants will be all you need.

HARVEST 65 DAYS
SEED / SEEDLING
PLANTING WARM

CUCUMBER TOURNESOL FIELD CUKE

Green 15-20 cm (6"-8") cucumbers. Local cucumber developed for Montreal climate by Coop Tournesol as the best market cucumber for our area.

HARVEST 60 DAYS
SEED / SEEDLING
PLANTING WARM

EGGPLANT BLACK BEAUTY

A well-adapted open-pollinated variety. It boasts big yields of large, glossy, delectable fruit. These large, glossy fruits are a deep purple so intense it looks black. They arise in great numbers on 30" plants.

HARVEST 80 DAYS
SEED / SEEDLING
PLANTING WARM

EGGPLANT LITTLE FINGERS

Grows in bunches like fingers on a hand. More slender and petite than your standard eggplant. Dark purple skin is thin and tender. A silky texture with few seeds. Mildly sweet flavour needing very little cooking. Little Finger is intended to be harvested young when 3-6".

HARVEST 70 DAYS
SEEDLING
PLANTING WARM

KALE RED RUSSIAN

This tender and delicious grey-green kale is pretty enough to plant among the flowers. 2' to 3' tall, stems are purplish with velvety gray green leaves that are shaped like big oak leaves. The purple colors become richer after frost.

HARVEST 50 DAYS
SEED / SEEDLING
PLANTING COOL

KALE VATES BLUE CURLED SCOTS

This gorgeous Scottish heirloom variety is a low-growing dwarf type with finely curled blue-green leaves. Grows to only 30-40 cm (12-16") tall, and about 60 cm (24") in diameter. Especially

HARVEST 55 DAYS
SEED / SEEDLING
PLANTING COOL

EGGPLANT LISTADA DI GANDIA

Introduced in France around 1850. Stunning 8" oval fruits are white with lavender stripes. Small 14" plants produce heavy yields of high quality thin-skinned fruits with mild white flesh. A very popular heirloom with a fabulous flavour and sweet, tender flesh.

HARVEST 90 DAYS
SEED / SEEDLING
PLANTING WARM

GARLIC MUSIC

Music hits the top of the charts when it comes to yields. White skinned with just a blush of pink, this garlic makes big cloves that are easy to peel. The taste is a medium hot, true garlic flavor that lasts for a long time. Very cold tolerant.

HARVEST 8 MONTHS
HEAD
PLANTING COOL

KALE SCARLET

A highly attractive and ultra-hardy variety, the curly, blistered violet-green leaves intensify in colour turning to violet-red after a few frosts. Vigorous and highly frost resistant. Generous yields of large sturdy and tightly curled leaves 90-100 cm (36-40") tall.

HARVEST 60 DAYS
SEED / SEEDLING
PLANTING COOL

LETTUCE DEER TONGUE

Medium-green, triangular leaves, perfect for baby salad greens. Its loose upright heads look much like a pinwheel. The olive-green leaves grow to a point, then spiral around the plant. Compact and slow to bolt. The leaves are sweet and tender.

HARVEST 50 DAYS
SEED / SEEDLING
PLANTING COOL

LETTUCE JERICHO

Bright green leaves, unique silky texture and sweet flavour even in the heat of the summer. Good selection for indoor or outdoor cultivation.

HARVEST 57 DAYS
SEED / SEEDLING
PLANTING COOL

LETTUCE LETTUCE MIX

A full lettuce experience of everything from oakleaf to romaine in green, reds and inbetweens.

HARVEST 65 DAYS
SEED / SEEDLING
PLANTING COOL

LETTUCE MERLOT

Striking, deep dark red, almost purple frilly leaves. A real eye-catcher in the garden and one of the darkest lettuces you can grow. A very crisp and open headed leaf type that stands upright with a waxy shine that makes an ideal salad lettuce at every stage.

HARVEST 55 DAYS
SEED / SEEDLING
PLANTING COOL

LETTUCE RED OAK LEAF

Burgundy oakleaf with golden sheen, perfect for teenage heads or babyleaf all year. Maintains mild flavour in summer heat. Excellent fall/winter selection due to mildew resistance and attractive red colour when light levels are decreasing. Heat-tolerant.

HARVEST 60 DAYS
SEED / SEEDLING
PLANTING COOL

ONION EVERGREEN

This winter-hardy bunching onion is always tender, mild and delicious. Great for northern gardens. Slim 30–36 cm (12–14") stalks never form a bulb and are cold hardy and disease resistant.

HARVEST 70 DAYS
SEED / SEEDLING
PLANTING COOL

ONION RED BARON

A very popular mid to late maturing easy-to-grow variety. Produces beautiful globe shaped, firm well flavoured bulbs of deep red skin, royal purple inner rings and strong flavour. Scallions harvest at 30–40 cm (12–15") tall, just before the bulb begins to swell, or harvest bulbs.

HARVEST 115 DAYS
SEED / SEEDLING
PLANTING COOL

ONION WALLA WALLA

"Walla Walla" is a First Nations word meaning "many waters." A very sweet, large round golden-skinned variety. Doesn't have good storage ability, but makes beautiful caramelized onions. Also great freshly sliced raw on pizzas and in salads.

HARVEST 150 DAYS
SEED / SEEDLING
PLANTING COOL

ORACH MAGENTA MAGIC

A distant cousin of spinach, amaranth and quinoa, the edible arrow-shaped leaves are a lovely fuchsia color. Prepare as spinach — young leaves raw in salads and cook the mature leaves. The flavour is sharp with subtle salty overtones. Plants grow over 1 m (3–4') tall.

HARVEST 45 DAYS
SEED / SEEDLING
PLANTING COOL

PEAS GREEN ARROW

An English main crop variety and standard home and market variety. Slim pointed pods are 11 cm (4.5") long and contain 8–11 small deep green peas. Pods are almost always borne in doubles. Very heavy reliable production. Medium vines grow 24–28" tall.

HARVEST 70 DAYS
SEED
PLANTING COOL

PEAS OREGON SUGAR POD

Easy to grow, non-climbing dwarf vines grow to approximately 30 inches tall and hold their pods up for easy picking. A prolific producer. The mild-flavored broad pods are 10–13 cm (4–5") long, and frequently set in doubles.

HARVEST 70 DAYS
SEED
PLANTING COOL

PEPPER, SWEET LIPSTICK RED ITALIAN PEPPER

A sweet, dark ruby red pimento type pepper that grows up to 10 cm (4") long. Perfect for all types of cooking because of its sweet flavour. Featuring red-ripening fruits — still delicious when green — with crunchy, meaty flesh. A steady producer throughout the summer.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM

PEPPER, SWEET SWEET CHOCOLATE

This rich, chocolate-brown pepper has a most wonderful flavour. The flesh is cola-red; very sweet and delicious. The medium-sized, semi-bell shaped fruit ripen very early, making this variety perfect for the north.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM

PEAS GOLDEN SWEET SNOW PEA

Pre-1860 heirloom variety of snow pea with beautiful blue-to-purple flowers. The pods start off a bright yellow and mature a beautiful golden. A part of Gregor Mendel's pea trials to work out nature's laws of inheritance. Sweet and crunchy, best harvested early and often.

HARVEST 75 DAYS
SEED
PLANTING COOL

PEAS SUGAREE SUGAR SNAP

Candy peas. The whole sweet pod can be eaten fresh. Very few of these will make it out of the garden. Vines grow to 2 m (6') and need trellising.

HARVEST 75 DAYS
SEED
PLANTING COOL

PEPPER, SWEET TEQUILA SUNRISE

Small plants set lots of unique, glowing, golden-orange, carrot-shaped fruit. These are superb for the flower garden or as a potted plant. Crisp 15 cm (6") fruit are full of flavour: sweet and sometimes slightly sharp-tasting. Very nutritious and fun to grow.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM

PEPPER, HOT BLACK HUNGARIAN

The unique, black-coloured fruits are the shape of a Jalapeno grown to 10 cm (4"). They are mildly hot with a delicious flavour. The tall plants, which can grow to 1 m (3'), have beautiful purple flowers that make this variety very ornamental.

HARVEST 80 DAYS
SEED / SEEDLING
PLANTING WARM

PEPPER, HOT CHINESE 5 COLOR

Screaming hot little peppers turn a rainbow of vibrant colours; from purple, cream, yellow, orange to red as they ripen. The plants are great for containers inside. Just pick a few any time to liven up your salsa.

HARVEST 70 DAYS
SEED / SEEDLING
PLANTING WARM

PEPPER, HOT GEORGIA FLAME

A piquant pepper from the Republic of Georgia. Fruits grow to 20 cm (8") long and have a thick, crunchy flesh on high-yielding 60-cm (2") high plants. An excellent salsa pepper.

HARVEST 90 DAYS
SEED / SEEDLING
PLANTING WARM

PEPPER, HOT JALAPEÑO

Produces 8-cm (3-in), thick-walled, moderately hot pods with a deep green colour, matures to a bright red. The skin may show a netting pattern, but it does not affect flavour. Widely adapted, Jalapeño plants are productive in dry or humid, hot or cool climates. 2,500 – 5,000 SHU

HARVEST 70 DAYS
SEED / SEEDLING
PLANTING WARM

PEPPER, HOT RED ROCKET

Tapered, thin-walled, 12–16 cm (5–6") long fruits. Dries quickly to a bright crimson red. Dried fruits have tender flesh which is nice and soft when cooked. Early, high yielding and widely adapted.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM

POTATOES MIXED POTATO ASSORTMENT

Perfect for a small garden or patio potato grower, our 500g Mixed Assortment of seed potatoes offers Sieglinde, Chieftan, Yukon Gold, Russian Blue, and Russian Banana Fingerlings, subject to availability. Seed potatoes produce about ten times their own weight per potato.

HARVEST FALL
TUBER
PLANTING COOL

RADISH FRENCH BREAKFAST

A long oblong radish with carmine coloured with white-tipped blunt bottoms, these 5–8 cm (2–3") long cylindrical roots are 1 cm (0.5") across and have a white interior. Produces an abundance of mild and crispy roots. They grow well spring through summer.

HARVEST 23 DAYS
SEED
PLANTING COOL

RADISH RAXE

A large round, red bunching type. Resists pithiness and splitting better than other bunching radishes.

HARVEST 25 DAYS
SEED
PLANTING COOL

RAPINI SPRING RAAB

Has small delicate leaves, stems, and buds, with a delicious wild flavour. Plants are approximately 52 cm (22") tall and do not produce a central head but abundant side shoots. Early and productive, shoots and flowers delicious for salads, stir-fries or garnish.

HARVEST 55 DAYS
SEED / SEEDLING
PLANTING COOL

ROQUETTE ARUGULA

A peppery leafy green with a nutty aroma. Gets spicier as the days get hotter. The Romans loved this spicy salad green. Try sprinkling on pizza just before serving.

HARVEST 35 DAYS
SEED / SEEDLING
PLANTING COOL

ROQUETTE WILD SYLVETTA

Compared to salad arugula, Sylvetta is slower growing with deeply lobed leaves with a lovely spicy flavour. Sought after by chefs. Young leaves will wake up your salads while more mature leaves delicious braised. Perennial Sylvetta does not bolt as quickly as salad arugula.

HARVEST 35 DAYS
SEED / SEEDLING
PLANTING COOL

SPINACH BLOOMSDALE

This great tasting heirloom spinach has thick, succulent, dark-green savoyed or crumpled leaves that are very sweet in salads or cooked. Very fast growing plants with upright growth. Bloomsdale Savoy has high disease resistance. Sow again in August to enjoy a fall harvest.

HARVEST 50 DAYS
SEED / SEEDLING
PLANTING COOL

SQUASH, SUMMER COSTATA ROMANESCO

A sought after Italian heirloom. The zucchini is gray-green, with fluted edges. Flavour is very rich and nutty. A unique summer squash. Excellent raw or cooked. Male blossoms used in many dishes. Harvest small for the best texture.

HARVEST 65 DAYS
SEED / SEEDLING
PLANTING WARM

SQUASH, SUMMER DARK GREEN

This zucchini produces small, uniform, high-quality fruit. An excellent producing plant, the skin is dark green and smooth. This versatile vegetable is delicious grilled, steamed, boiled, sautéed, fried, or used in breads. Enjoy baby squash as appetizers.

HARVEST 65 DAYS
SEED / SEEDLING
PLANTING COOL

SQUASH, SUMMER GOLDEN SCALOPPINI

Golden saucer-shaped fruits with scalloped edges. Bushy plants are early to produce and remain prolific throughout the season. Considered by squash lovers as most appetizing flavours of all summer squashes. A touch of green at its blossom end.

HARVEST 55 DAYS
SEED / SEEDLING
PLANTING WARM

SQUASH, WINTER ACORN SWEET REBA

Resistant Early Bush Acorn (REBA) produces five to six, uniform, 0.5–1 kg (1–2 lb), dark green, acorn-type fruit on each compact plant. They have a classic acorn squash flavor and texture but are noticeably sweeter. A good storage variety.

HARVEST 90 DAYS
SEED
PLANTING WARM

SQUASH, WINTER WALTHAM BUTTERNUT

Delicious, finely textured dark orange flesh. Uniform fruits with smooth, tan skin that is easily peeled with a potato peeler. This strain has been selected for uniformity of size, shape and yields. Excellent keeper if cured properly. The fruits grow to 2 kg (4–5 lb).

HARVEST 105 DAYS
SEED
PLANTING WARM

SQUASH, WINTER WINTER LUXURY PUMPKIN

Delicious pie pumpkin with a frosted netted appearance and smooth flesh. Grows lovely 2.7-kg (6lb) golden fruits that are perfect for pies.

HARVEST 105 DAYS
SEED / SEEDLING
PLANTING WARM

SWISS CHARD RAINBOW

Pretty enough for the flower garden, this richly flavoured variety has wide multi-coloured stalks and veins and deeply savoyed leaves that vary from light green to purple. Prepare leaves like spinach. Cook the colourful stems like asparagus. Small leaves raw in salad.

HARVEST 60 DAYS
SEED / SEEDLING
PLANTING COOL

TOMATILLO VERDE

A paper-like husk that encloses each green-yellow fruit. They grow more quickly than tomatoes and are more suited to cooler climates. Tomatillos are used in fresh salsas, and cooked in any number of sauces, including Mexican-style chili verde.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO BLACK CHERRY

The only truly black cherry tomato; beautiful deep purple, mahogany-brown cherries. Large, vigorous tomato plants with crops all season in huge clusters of 2.5 cm (1"), cherry tomatoes. They have a fine, rich flavour with a smoky sweet, tang. Indeterminate.

HARVEST 65 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO BLACK PRINCE

A black heirloom from Irkutsk, Siberia. The 57-85 g (2-3 oz) rounded fruits ripen to a deep garnet. Juicy with a rich fruity flavour. A unique salad tomato and also perfect for cooking. The plants produce a large crop and early. Indeterminate.

HARVEST 70 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO CHEROKEE PURPLE

An old Cherokee Indian heirloom, pre-1890 variety; beautiful deep dusky purple-pink, superb, sweet, real old-time flavour, and very large-sized fruit. A favourite dark tomato! Indeterminate.

HARVEST 85 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO DANCING WITH SMURFS

A true blue cherry tomato variety with small 3-3.5 cm (1-1.3") fruits that ripen to a unique dark-purple topped with red blush. A real true tomato flavour. Very productive vines grow easily to 2 m (6'). Indeterminate.

HARVEST 70 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO GALINA (YELLOW CHERRY)

Bright-yellow cherry with unique, perfectly balanced, subtly sweet, complex flavour and a thinner skin. Fruits grow to about 2.5 cm (1") in diameter and resist cracking. Indeterminate vines to 2 m (6') long.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO GREEN ZEBRA

These beautiful, zingy, early tomatoes are not only unusual, but very tasty. Striking bright green and yellow stripes, this medium mid-season tomato forms golf ball-sized 60 g (3 oz) fruits. Indeterminate.

HARVEST 80 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO MONTREAL TASTY

An heirloom from Quebec with bright red 110-g (4 oz) fruits that have an excellent, tangy, old-fashioned flavour. Great for canning and fresh eating. A lovely large red slicer. Indeterminate compact vines grow to 1.5 m (5').

HARVEST 80 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO PEACEVINE

A super-sweet delicious bright crimson cherry tomato. Sets masses of 2.5 cm (1") round cherries. High in vitamin C and gamma amino butyric acid (GABA), an amino acid and neurotransmitter that acts as a calming body sedative. Crack-resistant. Indeterminate

HARVEST 80 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO JAUNE FLAMMÉE

An old French variety. Fabulous fresh-eating tomato with an explosive, intense flavour that shines through. The outer walls are thick and meaty, with just enough juice to provide a full-bodied, citrus-like flavour. Fruits are 4-5 cm (1.5-2"). Indeterminate.

HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO MOSKOVICH

This extra-early Russian heirloom yields an abundance of beautiful deep red, large and meaty, 113-170 g (4-6 oz), smooth, round fruits with a luscious, rich taste. Produces continually to frost. Vines grow to 2.4 m (8'). Indeterminate.

HARVEST 60 DAYS
SEED / SEEDLING
PLANTING WARM

TOMATO ROSE DE BERNE

Dark rose-pink hue and well-loved heirloom flavour. Not too tart, not too sweet. Round fruits are 100-200 g (4-8 oz) with meaty flesh perfect for slicing. Soft-skinned, holds up well against cracking. Indeterminate.

HARVEST 80 DAYS
SEED / SEEDLING
PLANTING WARM

TURNIP PURPLE GLOBE WHITE TOP

Smooth, round roots average 7-10 cm (3-4") in diameter, are white below the soil line and bright purple above. Both the large, lobed greens and roots are good steamed or eaten raw in salads. Best eaten when young and tender. The flavour is mildly spicy like radishes.

HARVEST 55 DAYS
SEED
PLANTING COOL

HERBS

BASIL GENOVESE

From tomato sauce to pesto and even tea, there are a variety of uses for this sweet tasting, highly aromatic herb. Genovese stores well for longer periods. It is easy to grow and perfect for containers.

**HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM**

BASIL PURPLE DARK OPAL

A vigorous plant that holds its dark colour better than any other purple basil variety. It has exceptional flavour and is very productive growing tall purple stalks and attractive lavender flowers that look great in the garden.

**HARVEST 75 DAYS
SEED / SEEDLING
PLANTING WARM**

CILANTRO SANTO

The parsley-like leaves are used in Latin American and Asian cooking. The mature seeds, known as coriander, are also used in many dishes. Best direct-seeded. With a bit of cover it will cheerfully overwinter. Grows to height of 50 cm (20").

**HARVEST 60 DAYS
SEED / SEEDLING
PLANTING COOL**

BASIL GREEK

A compact spherical bush with tiny, brilliant green, piquant leaves. Aromatic, fresh and pleasantly spicy, the taste is a little like anise or cloves. Grows well in both containers and the garden. Great with tomatoes, in salads or sauces.

**HARVEST 70 DAYS
PLANT
PLANTING WARM**

CHIVES ORIGINAL

One of the easiest herbs to grow in your garden from early spring to fall. Chives add a wonderful onion-like flavour to many of your favourite dishes. Their delightful lavender-coloured flowers are edible and indicate spring's arrival. Reaches about 38 cm (15").

**HARVEST 85 DAYS
SEED / SEEDLING
PLANTING COOL**

DILL BOUQUET

Compact plants grow 75–90 cm (30–36") tall, and are full of flavour. A great bunching variety and works well in containers or smaller herb gardens. Bouquet has large seed heads and large seeds. Attractive to wasps that control cabbage moth.

**HARVEST 50 DAYS
SEED / SEEDLING
PLANTING COOL**

MINT MOROCCAN

A pretty compact variety of mint that looks great in a pot or in your garden. This hardy perennial can be used to flavour food, fancy drinks or as a delicious and healthy tea. An excellent nectar source for bees and other beneficial insects.

PLANTING COOL**

MUSTARD MIGHTY MIX

This Mighty Mustard Mix is a blend of green and purple mustards that ranges from flat to frilly and from sweet Dijon to knock-your-socks-off spicy. The greens grow in a rosette of leaves up to 46 cm (18") tall. Seeds will self sow and still provide plenty for mustard making.

**HARVEST 4 WEEKS
SEED
PLANTING COOL**

PARSLEY CURLY

A crinkled leaved traditional parsley. Strong, short stems support big clusters of highly curled dark-green leaves. Great non-bitter flavour for pasta or potato dishes, chopped in salads and soups or as a beautiful garnish.

**HARVEST 120 DAYS
SEED / SEEDLING
PLANTING COOL**

ROSEMARY COMMON

Has beautiful tiny purple-blue flowers and is a member of the mint family. The long needle-like leaves grow from a woody stem. Its distinct aroma makes it a favourite in the garden as well as in the kitchen. Grows to 70 cm (28"). Very attractive to beneficial insects.

**HARVEST 120 DAYS
SEEDLING
PLANTING WARM**

THYME ENGLISH

A beautifully fragrant and colourful herb. Don't be misled by thyme's tiny leaves. They may be small, but they are packed with aroma and flavour. Thyme will grow to about 30 cm (12"). Great for companion planting and borders.

EDIBLE FLOWERS

ANNIS HYSOP

A very attractive plant with edible purple flowers that produce abundant nectar and a light fragrant honey – attracting bees, butterflies and hummingbirds. Grows tall branches of anise-scented, medium green leaves that end in fuzzy flower spikes, up to 90–120 cm (36–48”).

ANNUAL
SEEDLING
PLANTING COOL

CALENDULA ERFURTER

Sprinkle salads and decorate cakes with these edible, tangy petals. The single flowers are deep orange spring to fall. A great cool-season cutting flower with straight, sturdy stems. Edible flower petals to decorate summer meals, and add colour to hot drinks.

PERENNIAL
SEED / SEEDLING
PLANTING COOL

DIANTHUS SWEET PINK

One of the most heavily scented pinks, strikingly sweet and clove-like. Edible flowers are wonderful in many dishes where colour and its clove scent and flavour add a new twist.

PERENNIAL
SEED / SEEDLING
PLANTING WARM

CENTAUREA BACHELOR'S BUTTONS

Bright blue, ruffled, 4-cm (1.5”) flowers bloom late spring and well into fall, in the garden or in containers. Grows to 30–90 cm (1–3’). Excellent as cut flowers, as dried flowers or potpourri – and as a colourful addition to any salad. Also known as Blue Cornflower, or Mountain Bluet.

ANNUAL
SEED / SEEDLING
PLANTING WARM

CHAMOMILE GERMAN

Has ferny leaves and bears fluffy white flowers in early summer, which can be dried and used for a relaxing tea. Derived from Greek — chamós (ground) and melos (apple), reflecting the fact that the plant grows low to the ground, and the fresh blooms have a pleasing apple scent.

PERENNIAL
SEED / SEEDLING
PLANTING COOL

LAVENDER ENGLISH

An aromatic of the English lavenders, with sweet and delicate perfume. Works well in containers or raised beds. With masses of aromatic cut flowers that are easily dried. Attractive to pollinators. 38 cm (15”)

PERENNIAL
SEEDLING
PLANTING COOL

MARIGOLD CRACKERJACK

Big, bright ball-shaped flowers in yellow and orange on sturdy plants 60–90 cm (2–3’) tall. The flowers are chrysanthemum-like with a mass of bright-coloured petals. The edible flowers, which have a citrus-like flavour, bloom all summer.

ANNUAL
SEED / SEEDLING
PLANTING COOL

NASTURTIUM DWARF JEWEL

An abundance of colourful flowers atop pretty green leaves. The whole plant is edible — leaves, flowers, and seed pods. The flowers add an exotic flourish to summer dishes, the leaves and stems pack a peppery punch. Lovely in beds and containers.

ANNUAL
SEED / SEEDLING
PLANTING WARM

SWISS MIX PANSY

A large-flowered, heirloom pansy that comes in a mix of blue, orange, purple, red, white and yellow. Flowers have a contrasting, dark blotch. They are quite cold resistant, and the flowers are edible.

ANNUAL
SEED / SEEDLING
PLANTING WARM

MARIGOLD LEMON GEM

Hundreds of petite flowers cover neat, low mounds of lacy foliage with a citrusy scent. Long-blooming for beds, borders and containers. Use the flowers to dress up salads and desserts or cooked in main dishes. Flavor is of citrus and spice. 10–12”

ANNUAL
SEED / SEEDLING
PLANTING COOL

SUNFLOWER MIX

Yellow, orange and red flowers on 1.5–2 m (5–7’) tall plants.

FRUITS

APPLE HONEYCRISP

A remarkably sweet, crisp apple. An excellent flavour, with a good balancing acidity. The attractive apples are medium-to-large in size, with a light green/yellow background and red-orange flush. Hardy. Best with a pollinator.

HARVEST SEPTEMBER
TREE PERENNIAL

APRICOT MORDEN

Golden yellow fruits with deep orange flesh. Ripens mid-August. Excellent for home preservatives. Self pollinating. Grows 4 m tall and 4 m wide. Very hardy

HARVEST AUGUST
TREE PERENNIAL

BLUEBERRY BLUECROP

Unbeatable for consistent yields. High-quality fruit and disease resistant. The 1-2 m (4-6') bush bears up to 9 kg (20 lb) of firm, light blue fruit. Berries are large – about 65 per cup compared to the 120 for other varieties. White flowers. Foliage turns red before dropping in the fall. Hardy to Zone 4.

HARVEST MID-JULY
SHRUB PERENNIAL

APPLE PARKLAND

Yellow green fruit with red bluish overlay. Creamy white flesh. Good for eating fresh and cooking, stores well. Ripens mid August. Tends to bear heavily biennially. Stores moderately well. Hardy to Zone 3. Needs a pollinator. 4 m tall, 4 m wide

HARVEST AUGUST
TREE PERENNIAL

BLACKBERRY PERRON NOIR

Good mid-season production. Very large, slightly sweet, black fruit, delicious when ripe. Vigorous plant that produces long, climbing stems without thorns. An excellent choice to decorate a wall or a pergola. Hardy to Zone 3.

HARVEST AUGUST
CANE PERENNIAL

BLUEBERRY DUKE

Clusters of delectable light-blue fruit make Duke easy to pick. This northern highbush variety is the earliest blueberry to ripen, yet the blossoms are not susceptible to frost damage. This attractive shrub is a good candidate for edible landscaping. Grows 1.2-2.4 m (4-8') high. Hardy to Zone 4.

HARVEST EARLY SEASON
SHRUB / PERENNIAL

BLUEBERRY NORTHLAND

The most cold-hardy Highbush variety. It is easy to grow and adaptable to many different soil types. The berries are excellent for jams and baking because of their high sugar content. Beautiful bright yellow wood and compact shape. 1.2-4 m (4-7') tall at maturity.

**HARVEST EARLY-
MID SEASON**
SHRUB / PERENNIAL

CHERRY STELLA

A self-fertile deciduous cherry tree that thrives in full sun and moist but well-drained soil. Excellent as a pollinator for other cherry trees. Reaches 3.7-6 m (12-20') in height depending on pruning and produces showy white flowers in the spring. Zone 5.

HARVEST JUNE
TREE PERENNIAL

CURRENT PINK CHAMPAGNE

Medium-sized currants are a translucent pink with a wonderful flavor that is less tart than red currants and more delicate than black currants. Delicious fruits ripen and are perfect for fresh eating, baking, jellies and preserves. Grows to 1-1.5 m (3-5'). Zone 3.

HARVEST SEPTEMBER
SHRUB / PERENNIAL

CURRENT WHITE PEARL

Has abundant clusters of translucent, sweet fruit on compact shrubs. The berries make a delicious, shimmering jelly, but their juicy, sweet flesh and can be eaten fresh as well. Plants are extremely hardy and are best grown in cooler climates.

HARVEST JULY
SHRUB PERENNIAL

CHERRY BUSH CRIMSON PASSION

A compact bush shape with beautiful, large, dark red cherries. Reaches 1.5-2.4 m (5-8') at maturity. Heavy yields, up to 10-15 kg (22-33 lb) per plant. The tart cherries are ideal for cooking, and sweet enough for fresh eating. Self-pollinating.

HARVEST MID-SEASON
SHRUB / PERENNIAL

CURRENT CONSORT

A dark black currant. Clusters of medium size fruit mature in June on a compact 1.2-1.5 m (4-5') bush. Europeans love its assertive flavour. Will grow and fruit in full shade. They are the cassis, commercially sold in soda, juice, wine, liquor or concentrate. Zones 4-7.

HARVEST JUNE
SHRUB PERENNIAL

CURRENT RED LAKE

This compact, mounding, deciduous shrub grows to 1-1.5 m (3-5') tall. Clusters of greenish-yellow flowers bloom in spring and give way to long, pendant clusters of bright red currants in July. The tart fruit can be eaten fresh, or be harvested to make jams, jellies and pies.

HARVEST JULY
SHRUB PERENNIAL

GRAPE CATAWBA

Vigorous, hardy, deciduous vine with bold-textured, deep green foliage. Grown for its medium-sized clusters of round dull purple-red grapes. Catawba grapes are well suited for jellies and juices, and for sweet white, red and rosé wines. Ripens late in the season.

HARVEST LATE SEPT.
VINE PERENNIAL

GRAPE KAY GRAY

Large berries on productive vines. It produces fine hardy white grapes, suited for fresh eating and wine making. Good ornamental value: bold summer foliage, showy fruit, fall colour. A good grape for juices and jellies. Very hardy

HARVEST
EARLY SEPT.
VINE / PERENNIAL

GROUND CHERRY AUNT MOLLY'S

Big, prolific plants produce gorgeous golden berries encased in lantern-shaped papery husks. Grows up to 60 cm (2') tall with a spread of 1.2 m (4'). The taste ranges from tart to very sweet, depending on the ripeness of the berries. Use in preserves and pies, or enjoy right out of the garden.

HARVEST 70 DAYS

PLANTING WARM
ANNUAL

MELON BLACKTAIL WATERMELON

Our best melon for short, cool seasons with crisp, sweet flesh. Solid dark green rind and orange-red flesh. Fruit averages 20 cm (8") across. Vines reach 3 m (10'). Excellent keeping quality and yields. Harvest just before ripe and melons will finish off in storage. 2.7–4.5 kg (6–10 lb).

HARVEST 75 DAYS
SEED / ANNUAL
PLANTING WARM

MELON ROCKY FORD HONEYDEW

Popular green-flesh muskmelon with a heavily netted rind, and smooth, sweet-flavoured flesh with a complex spicy flavour. This early maturing variety was developed in 1905 at Rocky Ford, Colorado as a "crate melon." Softball-sized 500-g (1-lb) fruit.

HARVEST 75 DAYS
SEEDLING / ANNUAL
PLANTING WARM

PEAR FLEMISH BEAUTY

Yellow fruit with pink hues. Firm, buttery and sweet yellow flesh. Partially self-fertile, another pear tree nearby is recommended to insure cross-pollination. Tree grows to 3.7 m (12') with a 3.7-m spread. Hardy to Zone 3.

HARVEST
LATE SEPT.
TREE / PERENNIAL

MELON PETIT GRIS DE RENNE

Dense 1-kg (2-lb) fruit has bright orange flesh that is sweet, juicy, perfumed and full of flavour. Recognized by its thin dark green skin that is striped in lighter shades of green and speckled in light yellow. An early variety that is well adapted to cool climates.

HARVEST 85 DAYS
SEED / ANNUAL
PLANTING WARM

PEACH EARLY RED HAVEN

Redhaven is a yellow-fleshed peach, ripening early to mid-season. It is capable of achieving very good flavours. Plant in full sun. Has some resistance to peach-leaf curl. A semi-freestone peach — the flesh comes away cleanly from the stone. Self-pollinating, hardy to Zone 5.

HARVEST EARLY
TO MID SEASON
TREE / PERENNIAL

RASPBERRY BOYNE

A very productive, extremely hardy, great disease resistance, popular cultivar. Consistent production of medium-sized deep red, tremendously flavourful fruit with a sweet, aromatic taste that matures. Sturdy upright canes support the abundant fruit production. Zone 3.

HARVEST
EARLY SEASON
CANE / PERENNIAL

RASPBERRY EARLY SWEET

An early, very hardy and heavy bearing, medium-sized cultivar. Sweet, larger, shiny black berries with the best black-raspberry flavour. A high producer of very easy-to-pick medium-to-large-sized fruit that grows on vigorous plants.

HARVEST
EARLY SEASON
CANE / PERENNIAL

RASPBERRY HERITAGE

Eat sweet, sun-ripened berries not just once a year but twice. Produces a main crop in fall and a second crop lower down on the same canes the next spring. Popular for this extended bearing season and the quality of its sweet, firm fruit. Hardy to Zone 4

HARVEST JULY-SEPT
CANE
PERENNIAL

STRAWBERRY ALBION

An ever-bearing type — produces berries all summer and into the fall. Great flavour and good yields of delicious, sweet berries. Will provide fruit the same year it is planted, but only for one or two years.

HARVEST
ALL SUMMER
SEEDLING
PERENNIAL

STRAWBERRY SEASCAPE

An ever-bearing type — produces berries all summer and into the fall. The berries are large, prolific, and have good flavour when picked ripe from the plant. Red on the outside, and bright red on the inside.

HARVEST MAY-OCT
SEEDLING
PERENNIAL

RASPBERRY FESTIVAL

A mid-late season variety with excellent hardiness and excellent productivity. The canes are spineless, medium in height with good suckering. Large red berries with excellent firmness and good flavour.

HARVEST MID-LATE SEASON
CANE / PERENNIAL

RASPBERRY KIWI GOLD

Fruit is a beautiful gold in colour. The berries are fuzzy, fragile and extremely sweet with just a subtle hint of tartness. Once ripe, eat them right away; they have a minimal shelf life. The canes of this New Zealand hybrid seldom need support.

HARVEST AUGUST
CANE
PERENNIAL

STRAWBERRY JEWEL

A hardy strawberry that consistently produces very good yields. The fruits are large, well shaped, easy to pick, have good texture and pleasing skin and internal color. They are great eaten fresh and freeze well, and they resist rotting in storage.

PERENNIAL

GARDEN SUPPLIES

THE LITTLE ACRE ORIGINAL

Instant raised-bed vegetable garden! Made from food grade UV-resistant woven polypropylene. Extremely durable. Has excellent drainage and aeration, and does not dry out quickly. 4' x 3' x 9" for 12 sqft of growing area. 9 cuft soil.

THE LITTLE ACRE GARDEN IN A BAG

A vegetable garden on the ground, or hanging. Jardin en sac is transportable and can fit easily into your small spaces. Pots, pockets, living walls and urban gardens in reused textiles with a geotextile lining.

COWPOTS 4" SQUARE

Pot made from composted cow manure, gives seedling a boost as it degrades in the garden. The 4" square is ideal for larger seedlings that stay indoors longer like tomatoes, peppers or eggplants. Greatly reduces transplant shock. 12 pots per package. 450ml per pot.

THE LITTLE ACRE URBAN GARDEN

The ultimate urban planter. Handmade in Quebec from re-used materials. Woven material and bottom in geotextile for excellent drainage and aeration of the roots. Corner pockets for poles to make an instant hoop house, or for the easy addition of a fence or trellis.

COWPOTS 3" SQUARE

An innovative seed starting pot that are made from composted cow manure. These earth-friendly "pots you plant" are a great alternative to plastic and peat pots. 3" pots are great for starting small plants like leafy greens or herbs indoors. 12 per pack. 200ml per pot

COWPOTS 6 CELL

The most economical option if you have a lot of plants to start. 18 pots per pack, attached together in groups of 6. Simply break apart before planting. The most compact seeding option for a confined space. 235ml per pot.

WATERING TIMER

This easy to use timer takes one 9V battery. Attach it between a splitter right at your spigot and a drip hose for a super simple and economical irrigation system for your vegetable garden.

BIODEGRADABLE MULCH

Cover your organic vegetable garden with this biodegradable mulch to prevent weeds and retain moisture and heat. Made of non-GMO corn. 4' x 12' per package.

RAISED BED GARDEN TRELLIS STEEL FRAME

A sturdy frame to hold up trellis netting. Made from four 10' steel pipes painted black with rust guard paint. Usually cut down to 2m (6-7') for easier harvesting. Includes two corner elbows to connect and a T-connector for the centre pole. Makes a 3-m (10') wide trellis.

RAISED BED GARDEN FENCING

This plastic chickenwire fence is too flexible for critters to climb. Soft enough and low enough to let the gardener into the garden. Protective enough to keep animals out. Needs fence posts. Staple directly onto wooden raised-bed garden for best results. 25'

FLOATING ROW COVER

This light blanket helps you extend the growing season by protecting your gardens from frost. Also can be used to protect from pests. Water and 85% of sunlight pass through. 6' x 12'.

RAISED BED GARDEN HEMLOCK 2"X8" PLANKS

Urban Seedling builds all its raised-bed gardens with these hemlock planks. Hemlock is sturdy, long lasting and resists rotting. A great economical alternative to cedar. 2" x 8" x 10'

RAISED BED GARDEN TRELLIS NETTING

Nylon trellis netting with 6" x 6" holes for easy reach-through harvesting. Tensile strength of 60lb. UV-resistant. Attaches to a metal or wooden frame with tie-wraps or a staple gun. Great for climbing vegetables. 6' x 12' per package.

RAISED BED GARDEN CORNER BRACKETS

Set of four triangle and four L-shaped corner brackets. Steel, powder coated black. Great for securing the corners of a wooden raised-bed to increase durability and for an attractive finished look to the garden. 7,6 x 7,6 cm (3" x 3"). Four of each per package.

SOIL CUSTOM BLEND

Urban Seedling's custom soil is especially blended for the vegetable garden. 1/3 compost, 1/3 peat moss and coconut coir and 1/3 organic gardening soil. Pre-fertilized with natural, organic fertilizers. No need for amendment.

MULCH BLACK CEDAR MULCH

Use this decorative black cedar mulch to enhance the look of your garden, control weeds, and retain moisture in the soil. Great for walkways as well as flower beds. 56 litre, 2 cuft.

FERTILIZER WORM CASTINGS

This all-natural, odourless and non-toxic vermicompost contains many essential plant nutrients and beneficial microorganisms. Contains plant growth promoters such as auxins and gibberellins. Great for maintaining a healthy soil structure. 5 L and 20 L bags

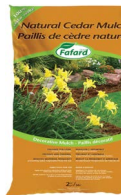

FERTILIZER CHICKEN MANURE

Ideal for the preparation and maintenance of flower beds and vegetable gardens, this all natural fertilizer is rich in calcium and naturally composted. Encourages plant growth by providing nutrients and organic matter to the soil. 2kg bag

MULCH NATURAL CEDAR MULCH

Use this decorative natural cedar mulch to enhance the look of your garden, control weeds, and retain moisture in the soil. Great for walkways as well as flower beds. 56 litre, 2 cuft.

FERTILIZER KELP FERTILIZER

Kelp fertilizer contains vitamins, natural chelating agents and amino acids. Improves seed germination, promotes root development, increases bloom set and size of flowers and fruit and increases absorption of soil minerals.

FERTILIZER FISH EMULSION

Fish emulsion is an organic product that serves to enhance your soils ecosystem by replenishing the variety of microbiology that can be lost or destroyed through use of herbicides, chemical fungicides and over tilling. Great to replenish nutrients in your soil. 1 L, 500 ml, 250 ml

PEST CONTROL DIATOMACEOUS EARTH

Food grade. Spread in a wide ring around individual plants or around the whole vegetable garden to control garden slugs and snails. Made from diatomite ground into a fine powder. It is a naturally occurring sedimentary rock made from fossilized diatom skeletons. 5 lb bag.

PEST CONTROL TANGLE-TRAP STICKY COATING

Apply Tangle-Trap Sticky Coating to trap and stop pests such as cankerworms, gypsy moths, tent-caterpillar larvae, cutworms and ants. This natural and organic product is ready to use and non-toxic. Safe for your trees and organic gardens. 8oz and 16oz containers

PEST CONTROL YELLOW STICKY TRAPS

These environmentally safe traps control insects without the use of pesticides. It's the yellow colour that attracts the insects to this ready-to-use, moisture-resistant, non-toxic trap. For use on vegetables, fruit trees and flowers. 10 traps in 1 package.

PEST CONTROL TRICHOGRAMMA MITE

A species of trichogramma specifically selected for controlling the flour moth, other pantry moths and clothes moths in your closet or pantry. These tiny fruit-fly-sized wasps lay their eggs in the pests' eggs, which the larvae then kill.

PEST CONTROL PRAYING MANTIS

Predatory at every stage of development for any garden insect. Attacks just about any insect it comes across, including large pests (crickets, grasshoppers, caterpillars, butterflies and moths, plant pests, flies, etc.). Sold in egg pods of around 100 eggs each. Use three egg pods for every 1500 square metres (5,000 square feet). Hang an egg pod on a plant using a small fastener (tie-wrap) or a piece of wire or string about 30 cm (12") off the ground. The baby mantises will emerge 15-60 days later, at room temperature.

PEST CONTROL SLUG SALOON

Uses bait to attract slugs and snails to the trap. A non-toxic and friendly way to rid your organic garden of pests like snails and slugs, earwigs, saw bugs, pill bugs and cutworms. Can be used around vegetables, fruit trees, berries and turf.

PEST CONTROL LADY BUGS

Ladybugs can consume up to 50 to 60 aphids per day, but will also eat a variety of other insects and larvae including scales, mealy bugs, leaf hoppers, mites, and various types of soft-bodied insects. A single ladybug can eat 5 000 aphids in a lifetime.

PEST CONTROL TRICHOGRAMMA GARD

A species of trichogramma specifically selected for controlling leek moth (Acrolepiopsis assectella), cabbage butterfly (Pieris brassicae) and other pest moths. These tiny fruit-fly-sized wasps lay their eggs in the pests' eggs, which the larvae then kill.

PEST CONTROL

GREEN LACEWING

Chrysoperla carnea, commonly called green lacewing or the aphid lion, is a small insect native to Quebec. Each egg is attached to a thin stem (pedicel) 1 cm long. The larvae are predatory, with strong mandibles that enable them to seize their prey – aphids, whiteflies, mealybugs, etc. Used to control pests in market garden crops (cucumbers, sweet and hot peppers, beans, eggplants, potatoes, etc.), fruit crops (strawberries), ornamental plants (orchids, cacti, succulents, etc.) and indoor arrangements.

PEST CONTROL

CUCUMERIS

This little predatory mite feeds on juvenile thrips, pest mites such as the two-spotted spider mite (*Tetranychus urticae*), certain species of tarsonemids, insect eggs, etc. Sold in slow-release packets of 1000 individuals. Thrips are very tiny insects that cause damage and transmit diseases to plants. They especially attack flower buds, greatly reducing harvest from fruiting vegetables such as tomatoes, peppers and eggplants. Sprinkle the cucumeris in your window boxes, flower pots or your garden once a month. Low cost and very effective.

PEST CONTROL

NEMATODE

These particular nematodes attack lawn grubs, which are the larval stage of May/June beetles, Japanese beetles and European chafers. Sold on sponges that hold millions of the beneficial microscopic worms. We sell a mix of two nematodes, one that is close to the surface, approximately 7,6 cm (3"), and one that goes deeper, approximately 18 cm (7").

GIFT CERTIFICATE

Urban Seedling gift certificates give the recipient access to any of our products or services. These can include anything from a vegetable garden, fruit trees, berry patches or landscaping services to any of the seeds, seedlings or gardening products in our store.

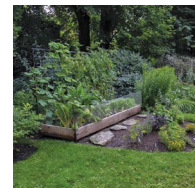

SERVICES

VEGETABLE GARDENS

ESSENTIAL

The perfect sized raised-bed vegetable garden for a small backyard. Allows for up to 50 varieties of delicious heirloom veggies. Includes a 10'x3' raised-bed garden with trellis and discrete fence, as well as a companion herb and flower garden. Also includes your choice of vegetables planted by our team 3 times per year, ensuring a full garden throughout the growing season. We even come back at the end of the year to close up the garden, and send you weekly e-newsletters to help you get the most out of your garden.

VEGETABLE GARDENS

ABUNDANCE

The perfect sized raised-bed vegetable garden for a large backyard. Allows for up to 75 varieties of delicious heirloom veggies. In addition to everything included in the Essential Raised-Bed Garden package (10'x3') you receive an additional 10'x2' raised-bed. This lets you try out every single variety of vegetable we have on offer. The herb and edible flower companion garden is larger, and the two raised-beds are separated by a mulched pathway.

VEGETABLE GARDENS

CUSTOM

We will build a vegetable garden to fit your space and lifestyle. Include a vegetable garden on your balcony, rooftop or any other sunny spot. We offer a range of materials for raised-bed construction like unistone, cedar and celtic block to match your landscaping. Add fruit, berries and other landscaping services to transform your yard into an edible paradise.

VEGETABLE GARDENS SCHOOL

We offer a variety of school programs ranging from Spring/Fall vegetable gardens planted by the kids during planting workshops, to in class herb growing programs, to lectures and classes on urban agriculture, vegetable gardening and the environment. We have wonderful gardens in daycare centres, elementary schools, highschoools and at Dawson College and Concordia. Contact us for more details on a tailor-made program for your school.

VEGETABLE GARDENS MAINTENANCE

Each vegetable gardening package includes 4 visits to your property to plant vegetables in season and close up at the end of the year. If you would like to have extra support, we can offer monthly, bi-weekly, or even weekly maintenance visits as a part of a yard-maintenance package. Going away for a vacation this summer? We will set up a temporary irrigation system and come by for weekly maintenance visits while you are gone.

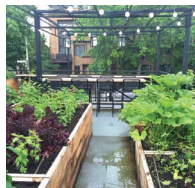

VEGETABLE GARDENS COMMUNITY

Vegetable gardening on your lunch hour! More and more employers are offering corporate community gardens to their employees right at the workplace. We plant with employees 3 times per year during lunch hour planting workshops and follow up with monthly maintenance workshops and garden closing at the end of the year. This package includes one 10' x 3' raised-bed per group of participating employees and weekly gardening instructions and email support. Irrigation is strongly recommended for best results.

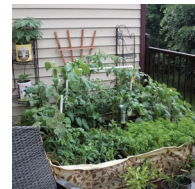

VEGETABLE GARDENS RESTAURANT

Be a leader in the urban movement of farm to table! Grow fresh organic vegetables at your restaurant location and start using the freshest organic ingredients. Planting and maintenance workshops keep employees learning and engaged, and we close the garden at end of the year. This package includes a custom raised-bed to fit your restaurant space, weekly gardening instructions and email support. Irrigation is strongly recommended for best results.

VEGETABLE GARDENS THE LITTLE ACRE PACKAGE

The Little Acre package is a great entry-level gardening package. Perfect to tuck in a corner on your balcony, in your yard, at the end of your driveway, or in any sunny spot available to you. Urban Seedling will deliver one 4' x 3' Little Acre on a pallet filled with our custom garden soil, a 4' trellis, and a fence, planted with your choice of organic heirloom vegetables, edible flowers, or herbs.

ADDITIONS POTATO BED

3 x 3 ft raised-bed. Planted with a 500 g Mixed Assortment of seed potatoes offers Sieglinde, Chieftan, Yukon Gold, Russian Blue, and Russian Banana Fingerlings. This assortment is subject to availability. Early-bird special complimentary April spring planting of leafy greens. This package includes raised-bed, special-blend vegetable gardening soil-mix, fence, planting and closing at the end of the year.

ADDITIONS ASPARAGUS BED

3 x 3 ft raised-bed with 9 asparagus crowns. Once your asparagus bed is well established, you will enjoy a springtime full of the best asparagus spears you have ever tasted for the next 20 or so years. Asparagus self-propagates to fill your raised-bed. This package includes raised-bed, special-blend vegetable gardening soil-mix, fence, planting and closing at the end of the year.

ADDITIONS SQUASH BED

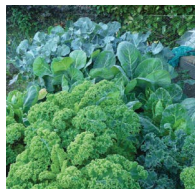

4 x 4 ft raised-bed planted with your choice of 3 different summer squash, zucchini, winter squash or melon. Early-bird special complimentary April spring planting of leafy greens. This package includes raised-bed, special-blend vegetable gardening soil-mix, fence, planting and closing at the end of the year.

ADDITIONS

BRASSICA BED

4 x 4 ft raised-bed with 4 Everest broccoli, 4 cabbage (Red Jewel or Copenhagen), 4 Zamboni Raab rapini and 4 kale (Red Russian, Redbor and/or Vates blue curled). A lovely mix of delicious superfoods! Put them in their own bed to free up precious space. Complimentary fall planting of leafy greens after harvest.

HORTICULTURE

YARD MAINTENANCE

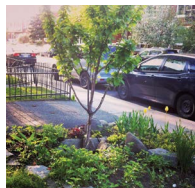

Hire one of our trained horticulturists to remove the burden of weeding, pruning, mulching and maintaining your beautiful property's labour-intensive needs. We can open your garden in the spring and close it down for winter, or have weekly, bi-monthly or monthly visits, depending on your desired level of involvement or property needs.

HORTICULTURE

EDIBLE LANDSCAPING

Have you ever dreamed of grazing through your property every day to collect your daily bounty of nuts, berries, fruits, vegetables, herbs and edible flowers. We can transform your whole property to maximize your ability to grow your own fresh organic produce while maintaining the desired esthetic look to match your home and lifestyle.

HORTICULTURE

GARDEN DESIGN & CREATION

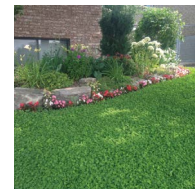

Is your property in need of a facelift? We can send you on of our trained horticulturists to walk with you through your property and explore the world of possibility available to you. If you desire a truly well planned garden design, combining annual, perennial, edible and decorative shrubs, flowers and trees. That's just what you'll get, we send you a design and make it a reality. And your horticulturist will continue to work with you throughout the season to ensure your property looks the way you both envisioned.

LAWN ALTERNATIVES

CLOVER

Are you tired of endless weeding, watering and cutting, but still want to have the greenest and lushest lawn on the block. You can turn heads in a new way by forsaking the status quo and being one of the few to embrace the world's best and most beautiful lawn cover. Its six-inch tap root accesses the water that grass never could, and our unique variety of monoculture clover grows so slowly that you'll only cut once or twice a year. Its a high-traffic drought-resistant lawn cover that will make you wish you had made the switch ages ago.

LAWN ALTERNATIVES

ORGANIC LAWN CARE

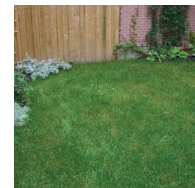

Did you know the chemicals people have been using on lawns never go away? They are poisonous, toxic and do way more damage than good. There exists an alternative and you don't need to take our word for it. It's common knowledge the nicest and most prestigious lawns are at Harvard University and they abandoned chemical fertilizers and pesticides for natural organic ones years ago. We will aerate and treat your lawn with the same proven regimen as the best. Sign up for the full six treatments or just focus on what your lawn needs most.

LAWN ALTERNATIVES

SOD

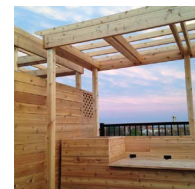

Is your lawn beyond repair, lumpy, overrun with weeds, more crab grass than blue grass, or slopping towards your house and causing leaks in your foundation? Maybe it's time for a fresh start. We can re-grade and slope your property, replace your old depleted topsoil and roll out some new Kentucky bluegrass.

LANDSCAPING

PERGOLA

Looking for some shade and privacy? Our team of carpenters will build you a beautiful cedar pergola for your backyard or terrace. To add some greenery, delicious grapes or kiwis can be planted to create a nice cool spot during those hot summer days. We can build any size or style you like, and include custom-made matching flower boxes or benches to truly transform your property.

LANDSCAPING
UNI STONE

Now that you have your vegetable garden, edible landscaping, pergola and flower gardens, join it all together with a beautiful unistone, flagstone or patio stone pathway or patio.

LANDSCAPING
LIVING FENCE

Need some extra privacy? A hedge is a great way to provide some shade and intimacy for you and your family, as well as some much needed habitat for birds - great natural pest control! Consider cedar, blueberry, cherry bush, box wood and many more flowering, fruiting colourful additions to your landscape.
